

Stained Glass Necklaces

For this project you will need:

- Rigid, thin plastic from food containers
- Yarn
- Scissors
- Sharpies
- A hole punch

1. Draw the shape of your charms on to the top of the plastic container.
2. Cut around the outline of your charms.
3. Color the cut out charms with sharpies. If your charms are very small, it may be easier to color them before you cut them out.
4. Use a hole punch to put a hole in each charm.
5. Cut a piece of yarn long enough to create a necklace that will fit over your head. We found 18-24 inches worked well.
6. String your charms onto the piece of yarn one at a time. We tied a knot around each charm so that it they would stay in place rather than bunching up together.
7. Keep stringing until all of your charms are on your necklace.
8. Tie the two ends together to create a necklace.
9. Now wear your necklace with pride!
