

Toy Stories

For this project you will need:

- random toys
 - cell phone or camera
1. Gather some toys. Whatever you have at home will work!
 2. Arrange the toys in a way that tells a story. Your story can be as realistic or silly as you like!
 3. Photograph your toy story from different perspectives and share them with your friends and family. Share them with us at ahha using #SocialDistanceStudio on social media!

This creative project is brought to you by teaching artist Katie Ryan.
